## Business Talks

June 13, 1895.

The time made by Burt Lee in the trial heats last week but bears out the old saying that "trotting horses have no particular lineage," and are not, so to speak "born to the purple." Burt Lee was picked up for a carriage horse without reference to his sire or dam—he had the right appearance and a smart gait that pleased his owner, his possibilities have not half been shown and there is no telling what he may develop into before next season's races. One of the best of the olden time trotters, Dutchman, was a common cart horse without any thoroughbred origin. The trotter of today is but the result of the careful selection in mating animals. Rarus, the prodigy who first beat 2:14, was sired by an unknown fish-huckster's horse, who even after he had gotten the wonderful cold pulled a wood cart. There may be other horses in the islands which, if properly handled, will do even better work than Burt Lee, their joints may want lubricating and if that is the only trouble there is nothing better than injections of oil provided you get the right kind and there is only one "right kind" and that is "Vacuum."

We have been handling these oils for years and can recommend them as the safest oils manufactured for use on sugar mill or other fine machinery.

The famous 600 W is in use on nearly all the plantations here and in most of the electric light and power works in the United States. In a letter to the manufacturers Thos. A. Edison says:

"I find that the oils you have furnished, have proved very satisfactory."

The Vacuum Oil is made in several brands of which we carry 600 W, Vacuoline Engine and Arctic Engine Oil, this latter for electric light, centrifugal and general high speed work. It is particularly adapted to the Edison system, being used by the Edison Company and recommended by them.

When it comes to price Nothing equals Vacuum Because it is lasting.

We handle the celebrated Pennsylvania Lawn Mower because we consider them the best in use. Other styles have been put upon the market only to be relegated to the back yard but you never find a "Pennsylvania" that is not fit for use. They are easy to run and no trouble to keep in order. We have them with 10 to 21 inches blade.

Don't file a mower blade; Just put a little oil on it And sprinkle with emory powder, Then work the machine back And forward and the blade is sharpened.

We carry the largest stock of Blasting Powder and the celebrated Hercules Powder in this market. The latter is made especially for us for this climate. No one has ever questioned our assertions regarding packing. Our stock comprises all sorts used in engine rooms and the selection has been carefully made. We have a full stock.

We have lately added to our goods used in the out of town districts a lot of Sherman's celebrated Mexican Saddle Trees. They were made to order for us and will fit both the rider and the horse. Nothing better in this line has ever been offered the public and the prices are astonishingly low.
